

Big Green Egg®

100% Natural Charcoal

About our charcoal

Every cooking session starts with the right fuel. Our 100% natural charcoal with FSC quality mark is exactly what you need. Big Green Egg charcoal comes from beech and hornbeam, and has an extremely long burning time. This type of wood ensures a neutral basis. For an extra smoky touch, add Big Green Egg Wood Chips or Chunks to your charcoal, to taste.

The 100% natural charcoal (free from chemical ingredients, aromas and flavourings) is produced in Europe from wood residue or trees specially cultivated in sustainably managed forests. For each tree felled, a new one is planted in its place. The extra-large pieces burn slowly, create no unnecessary smoke and – unlike many other types of charcoal – remarkably little ash.

Big Green Egg Charcoal comes in 9 and 4.5 kilo bags. The charcoal in the 4.5 kilo bags is slightly smaller. Making it perfect for use in smaller EGG models.
